

Bhavya Parvathi

Cybersecurity Professional | API Security | GRC & Data Privacy | Penetration Testing
(+91) 9949589677 | bhavyanagasai@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

Cybersecurity professional with offensive (CAISR – Red Team Leaders) and API security (Wallarm Certified) credentials, complemented by ISC² CC and Google Cybersecurity certifications. M.Tech engineering background applied to vulnerability assessment, API penetration testing, and DPDPA compliance. Hands-on experience with Burp Suite, Nmap, Splunk, and Postman. Pursuing CEH (EC-Council) to deepen offensive security expertise. Open to SOC Analyst, Junior Penetration Tester, or AppSec / GRC roles.

TECHNICAL SKILLS

Network Security: TCP/IP, DNS, HTTP/HTTPS, Firewalls, IDS/IPS, Wireshark, Nmap
Security Operations: Log analysis, SIEM (Splunk), Incident Response lifecycle, Threat detection
Vulnerability Assessment: OWASP Top 10, Nessus/OpenVAS, SQLi, XSS, Burp Suite, Recon-ng
API Security: REST APIs, OAuth, JWT, OWASP API Top 10, Postman, Wallarm testing methodology
GRC & Data Privacy: DPDPA 2023 (India), Risk assessment, Security policy drafting, Compliance mapping
Cloud & IAM: IAM fundamentals, RBAC, Shared responsibility model
Tools: Burp Suite, Splunk, Nmap, Postman, Wireshark, VirusTotal, Recon-ng, Email header analyzer
Scripting & OS: Python (basic), Bash, Linux CLI, Windows security basics

CERTIFICATIONS

CAISR – Adversarial Recon & Red Team Methodology Red Team Leaders	Mar 2026
API Security Certified Associate Wallarm	Mar 2026
Digital Personal Data Protection Act (DPDPA) 2023 DPDPA Certification Body	Feb 2026
Certified in Cybersecurity (CC) ISC ²	Dec 2025
Google Cybersecurity Professional Certificate Google / Coursera	Sep 2025
CEH – Certified Ethical Hacker (self-study, in progress) EC-Council	Expected 2026
Python Programming GUVI	Aug 2024
Generative AI GUVI	Sep 2024

PROJECTS

- API & Web Application Penetration Testing** *Tools: Burp Suite, Postman, OWASP ZAP*
- Conducted black-box security assessment of a test web application and REST APIs using OWASP Top 10 and OWASP API Top 10 methodology.
 - Identified 5 vulnerabilities including Broken Object Level Authorization (BOLA), improper authentication, and input validation flaws; rated 2 as High severity.
 - Documented full findings with PoC steps, CVSS severity ratings, and remediation recommendations in a structured VAPT report.
- Network Reconnaissance & Vulnerability Assessment** *Tools: Nmap, Recon-ng, Burp Suite, OpenVAS*
- Performed end-to-end footprinting and reconnaissance on a test lab environment, mapping 12 open services and 3 exposed ports.
 - Used Nmap scripting engine (NSE) to enumerate OS, services, and potential misconfigurations; flagged 4 exploitable vulnerabilities.
 - Produced a structured vulnerability report with risk ratings and prioritised remediation steps.
- Phishing Email Analysis & Threat Investigation** *Tools: VirusTotal, Email Header Analyzer, MXToolbox*
- Analysed 10+ suspicious email samples to identify spoofed sender domains, malicious redirect links, and DKIM/SPF failures.
 - Correlated email header metadata with VirusTotal threat intelligence to confirm phishing indicators; documented IOCs and recommended mail gateway rule updates.

EDUCATION

M.Tech in Structural Engineering	2022 – 2024
Aditya Engineering College (A), Kakinada CGPA: 8.67	
B.Tech in Civil Engineering	2018 – 2022
Aditya Engineering College (A), Kakinada CGPA: 8.21
