

BHAVYA PARVATHI

SOC Analyst | Threat Detection & Incident Response | API Security | GRC

(+91) 9949589677 • bhavyanagasai@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFILE SUMMARY

Cybersecurity professional with hands-on experience in threat detection, phishing triage, IOC investigation, and SIEM log analysis using Splunk. Practical background in web application and API security testing, giving a strong offensive perspective to blue-team detection work. Holds ISC² CC, CAISR (Red Team Leaders), Wallarm API Security, and Google Cybersecurity certifications. Pursuing CEH. Engineering background from M.Tech delivers a systems-thinking advantage for correlating anomalies across complex environments. Targeting SOC Analyst or Blue Team roles.

CORE COMPETENCIES

SOC & Detection	Splunk (SIEM), Log Analysis, Threat Detection, Incident Response Lifecycle, IOC Triage, Phishing Investigation
Threat Intel	VirusTotal, MXToolbox, Email Header Analysis, DKIM/SPF Forensics, IOC Documentation, MITRE ATT&CK (awareness)
Network Security	Wireshark, Nmap (NSE), TCP/IP, DNS, IDS/IPS, UFW/iptables, Recon-ng, OpenVAS, VirtualBox Lab
AppSec (Offensive)	Burp Suite, OWASP ZAP, OWASP Top 10 & API Top 10, SQLi, XSS, CSRF, IDOR, Auth Bypass, CVSS
API Security	REST, OAuth 2.0, JWT, Postman, Wallarm Methodology, BOLA, Broken Auth, Input Validation
GRC & Privacy	DPDPA 2023, Risk Assessment, Security Policy Drafting, Compliance Mapping
Scripting & OS	Python (basic), Bash, Kali Linux, Ubuntu, Windows Security

EXPERIENCE

Cybersecurity Intern | Redynox

Jan 2025 – Feb 2025

Tools: Burp Suite, OWASP ZAP, WebGoat, Wireshark, UFW/iptables, VirtualBox, Kali Linux

- Detected and analysed SQLi, Reflected/Stored XSS, and CSRF vulnerabilities on OWASP WebGoat using OWASP ZAP; mapped all findings to OWASP Top 10 and documented attack vectors, impact scope, and recommended detection controls (input sanitisation, parameterised queries, SameSite cookies, CSRF tokens).
- Built a VirtualBox network lab (Ubuntu router + Kali Linux client); configured iptables/UFW firewall rules and captured live DNS/ICMP/TCP traffic in Wireshark — identified anomalous traffic patterns and documented detection signatures.
- Produced structured security assessment reports for both tasks with PoC screenshots, root-cause analysis, and prioritised remediation steps — written for both technical and non-technical stakeholders.

PROJECTS

Phishing Triage & Threat Investigation | Independent Research

2025

Tools: VirusTotal, Email Header Analyzer, MXToolbox

- Investigated 10+ phishing email samples; extracted and correlated IOCs (spoofed sender domains, malicious redirect URLs, DKIM/SPF failures) using VirusTotal and MXToolbox; produced a structured threat report with recommended mail gateway filter rules to block recurrence.
- Identified attacker TTPs including domain spoofing, redirect chaining, and header manipulation; documented findings in IOC format aligned with threat intelligence reporting standards.

Network Reconnaissance & Vulnerability Assessment | Independent Research

2025

Tools: Nmap (NSE), Recon-ng, OpenVAS

- Performed end-to-end footprinting on a test lab environment; mapped 12 open services and 3 exposed ports using Nmap NSE scripting for OS/service enumeration — flagged 4 exploitable vulnerabilities with risk ratings and prioritised remediation steps.

Tools: Burp Suite, Kali Linux | Target: Juice Shop v19.1.1

- Identified and exploited 5 vulnerabilities: Authentication Bypass, IDOR (horizontal privilege escalation via basketId manipulation), Sensitive Endpoint Exposure, DOM XSS, and Filter Bypass XSS with obfuscated iframe payloads.
- Produced a formal VAPT-style report with PoC steps, impact analysis (session hijacking, cookie theft, data exfiltration risk), and OWASP Top 10 mapping — demonstrating structured offensive methodology applicable to detection rule design.

CERTIFICATIONS

Certified in Cybersecurity (CC)	ISC²	Dec 2025
CAISR – Adversarial Recon & Red Team	Red Team Leaders	Mar 2026
API Security Certified Associate	Wallarm	Mar 2026
DPDPA 2023 Certification	DPDPA Certification Body	Feb 2026
Google Cybersecurity Professional	Google / Coursera	Sep 2025
CEH – Certified Ethical Hacker (in progress)	EC-Council	Expected 2026

EDUCATION

M.Tech — Structural Engineering | Aditya Engineering College (A), Kakinada2022 – 2024 | CGPA: 8.67
B.Tech — Civil Engineering | Aditya Engineering College (A), Kakinada 2018 – 2022 | CGPA: 8.21
