# BHAVYA PARVATHI

**CYBERSECURITY | APPLICATION SECURITY | SECURITY RESEARCH**

+91 9949589677 | bhavyanagasai@gmail.com | LinkedIn | GitHub | Website

## PROFESSIONAL SUMMARY

Entry-level cybersecurity professional with internship experience in cyber-attack simulation, web application security testing, static APK analysis, and network security. Contributed to backend components, database functionality, and simulation logic for a battery cybersecurity platform. Hands-on with Burp Suite, OWASP ZAP, Wireshark, and Nmap; eager to learn AI application security.

## TECHNICAL SKILLS

**Application Security:** VAPT, OWASP Top 10, Burp Suite, OWASP ZAP, XSS, CSRF, IDOR
**Security Research:** Static APK analysis, IOC analysis, phishing investigation, MITRE ATT&CK
**Network Security:** TCP/IP, DNS, Nmap, Wireshark, UFW firewall
**Systems & Scripting:** Windows, Kali Linux, Ubuntu, Python (basic), Bash
**Security Architecture:** Threat modeling, authentication requirements, replay protection, end-to-end encryption requirements

## PROFESSIONAL EXPERIENCE

**Cybersecurity Architecture Research Intern | iTelematics Software Pvt. Ltd. (EV.ENGINEER™)** | *July 2026 – Present*

- Developed backend components, database functionality, and simulation logic for a battery cybersecurity platform's Cyber Attack Simulator, covering telemetry spoofing, replay attacks, and BMS intrusion scenarios.
- Contributed to a Detection Rule Simulator and performed static and advanced static APK malware analysis; supported cybersecurity research and team coordination.
- RESQNET (ongoing, within internship): lead cybersecurity architecture and threat-modeling contributions for BLE, Wi-Fi Direct, and delay-tolerant offline emergency communication, including encryption, authentication, replay protection, and malicious-relay resilience.

**Cybersecurity Intern | Redynox Cybersecurity Solutions** | ***February 2026 · 1 month***

- Configured a VirtualBox lab with Ubuntu as router and Kali Linux as client; enabled IP forwarding, configured UFW rules, and analysed DNS, ICMP, and TCP traffic in Wireshark.
- Tested SQL injection, XSS, and CSRF in OWASP WebGoat using OWASP ZAP and manual testing; documented findings and proof-of-concept demonstrations.

## PROJECTS

**OWASP Juice Shop — Web Application Vulnerability Assessment** | *February 2026*

- Tested authentication bypass, IDOR, sensitive endpoint exposure, DOM-based XSS, and an advanced XSS scenario; used Burp Suite to inspect and modify HTTP requests and documented test steps and potential impacts.

**Cybersecurity Literacy — AI-SEC Hackathon** | ***September 2026***

- Collaborated with a team to build a basic working prototype of a cyber-safety awareness tool.

## CERTIFICATIONS

ISC² Certified in Cybersecurity (CC) • Google Cybersecurity Professional Certificate • Wallarm API Security Certified Associate • DPDPA 2023 • CEH (exam preparation)

## EDUCATION

**M.Tech, Structural Engineering** **- 80.10%** | Aditya Engineering College (A), Kakinada | 2022–2024
**B.Tech, Civil Engineering** **- 74.60%** | Aditya Engineering College (A), Kakinada | 2018–2022
